

Racking Horses have seen a large demand in Europe, especially Speed Horses, in the last couple of years. It is with great enthusiasm that RHBAA announces that we are now listed on the European Union's website as an official breeding body in the USA. This has been in the works for the last 18-24 months and will allow the expansion of the Racking Horse breed to continue in Europe. We have also licensed a Commissioner in Europe to help with registrations. We are excited about this partnership and we expect an even larger demand for Racking Horses in Europe with this recognition of our breed.
